Application/Control Number: 10/634,115 Page 2

Art Unit: 2862

Restriction to one of the following inventions is required under 35 U.S.C.
 121:

- I. Claims 5-7, drawn to a tool for downhole drilling apparatus, classified in class 324, subclass 338.
- II. Claims 32-36, drawn to a method for steering a downhole drilling apparatus including operating a processor to produce an output signal as a function of borehole depth based on first and second differential signals and also controlling the drilling direction of the drilling apparatus in response to the output signal, classified in class 324, subclass 337.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions I-II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I-II have separate utility such as by itself for its intended purpose. Invention I is directed to a tool for downhole drilling apparatus and Invention II is directed to a method for steering a downhole drilling apparatus including operating a processor to produce an output signal as a function of borehole depth based on

Application/Control Number: 10/634,115 Page 3

first and second differential signals and also controlling the drilling direction of the drilling apparatus inn response to the output signal. The inventions are distinct, each from the other because of the following reasons: In the instant case, invention II has separate utility such as controlling the drilling direction.

See MPEP § 806.05(d).

- 3. Because these inventions are distinct for the reasons given above and the search required for one group is not required for other group, restriction for examination purposes as indicated is proper.
- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 5. A telephone call was made to Mr. Mark Kammer on May 18, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Application/Control Number: 10/634,115 Page 4

Art Unit: 2862

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jay M. Patidar whose telephone number is 571-272-2265. The examiner can normally be reached on M-Thur 8:00-6:30.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
